Technical, Regulatory & Market Dossier — Silitex in Israel

D4 / D5 / D6 regulatory status · Silitex product map against incumbent grades · R&D qualification route · supply model

Prepared for: Dr. Federica Biti, Silitex S.r.l. (Cologna Veneta, Italy)
Prepared by: Avshi Sapir, Sapirim (Israel)
Date: 18/10/2026 · Status: discussion draft — product statements to be confirmed by Silitex before use with customers

1. Summary

This note answers the open question from our call on 16/10/2026 ("Does Israel still allow D5 in cosmetics?") and maps where the Silitex range fits the Israeli market. Short answer: the binding EU deadline is 06/06/2027 for leave-on cosmetics. Every Israeli manufacturer that sells to the EU must meet it, so D4/D5/D6-free formulations are a real, dated reason for R&D teams to test alternatives now. The domestic Israeli position is still to be confirmed (see 2.2).

2. Regulatory status of cyclic siloxanes

2.1 European Union (verified)

Substance	Rule	Limit	Applies from
D4	EU Cosmetics Regulation (EC) 1223/2009, Annex II (prohibited substances)	Prohibited in cosmetics	Already in force
D5	REACH Annex XVII, as amended by Reg. (EU) 2024/1328	≤ 0.1 % w/w in rinse-off cosmetics	31/01/2020 (in force)
D5	REACH Annex XVII, Reg. (EU) 2024/1328	≤ 0.1 % w/w in leave-on cosmetics	06/06/2027
D6	REACH Annex XVII, Reg. (EU) 2024/1328	≤ 0.1 % w/w in rinse-off and leave-on cosmetics	06/06/2027

Regulation (EU) 2024/1328 was published in the EU Official Journal on 17/05/2024. It also restricts D4/D5/D6 in other consumer and professional products, with separate dates per product type.

2.2 Israel (to be confirmed)

- **Cosmetics framework:** Israel's Ministry of Health cosmetics reform is modelled on EU Regulation (EC) 1223/2009 (responsible person, safety assessment, product information file, GMP, electronic notification).
- **Open point:** The D5/D6 limits above sit in REACH, not in the Cosmetics Regulation. I have not yet found an official Israeli text that applies the REACH Annex XVII cyclosiloxane limits to products sold only in Israel. I am confirming this with the Ministry of Health cosmetics unit and will send you the reference.
- **Practical effect:** Israeli exporters to the EU (cosmetics, personal care, and textile/home-care products sold in Europe) must comply with the EU dates regardless of the local position. This is the commercial driver.

3. Silitex grades mapped to incumbent products

Matches are taken from the Silitex 2026 catalogues and our cross-reference table. Exact equivalence must be confirmed on TDS and by lab test before any customer claim.

Application	Incumbent type	Silitex grade (code)	Note
Elastomer gel (skin feel, primers)	Dow 9040 / 9041 type	SILIBLEND CROSS D (PO597) · DIVICROSS (PO680)	Gel in dimethicone — D5-free route vs D5-based 9040
Dimethicone / dimethiconol gum blend	NuSil CareSil CSF-3504, Dow gum blends	DIMETIBLEND (H2057) · ALKABLEND 6800 (H2256)	Silitex: 50 % dimethiconol feasible (16/10 call)
Dimethicone emulsion (body care)	Dow emulsions, 60 % type	BODYSIL 60 (E2404)	INCI: Dimethicone, Laureth-4, Laureth-23
Water-soluble silicone (PEG-12 dimethicone)	XIAMETER OFX-0193 / DOWSIL 193	PEG-12 DIMETHICONE (PO667) · PEG-10 DIMETHICONE (PO708)	Not a trisiloxane super-spreader
Amino softeners, textile (cyclic-free)	Amino microemulsions	MICROAMISIL (E1352) · MACROAMISIL (E1386) · IDROAMISIL 250 (E1453)	Textile/home care. Cyclic-free statement to be confirmed in writing
PDMS emulsions	XIAMETER MEM-0036 / DC 36 type	EVERSIL 35 / 60 / 350 / 3500	35–60 % active
Plant-origin, silicone-free additives	Eco-label detergents, green paints	FISIOREX 1000 · EVEROIL 35	Eco-label / biodegradability data to be supplied
Antifoams, detergents and process	Dow Antifoam A / 1520 type	BERETEX 350–1600 · DYNAPAN range · ANTISCHIUMA 3	Silicone antifoam emulsions
Paper and pulp defoaming	Antifoam A FDA / AFE-1520 type	CPL 2907 (PO497, FDA)	Also CPL 2700 / 2730
Wax emulsions (paper, leather, polishes)	PE / microcrystalline wax emulsions	CARNAUBEX 442 / 300 / C · WASPER D	Not positioned for cosmetics
Water repellents (construction)	Silane / siloxane repellents	SILWALL PR · SILWALL PRF SUPER · IDROREX	Range being improved (16/10 call)

Not included until Silitex confirms a grade: high-temperature refinery defoamers and agro super-spreaders (organo-modified trisiloxane type). Food sector: on hold as agreed on 16/10/2026.

4. Where the demand is (by sector — account names after the agreement)

Sector	Need	Lead Silitex grades
Cosmetics & personal care (EU exporters)	D5/D6-free leave-on before 06/06/2027; second source for NuSil gels	SILIBLEND CROSS D, DIVICROSS, DIMETIBLEND, BODYSIL 60
Detergents & household care	Foam control on filling lines; eco-label claims	BERETEX, DYNAPAN, FISIOREX 1000, EVEROIL 35
Textile finishing (EU exporters)	Cyclic-free softeners	MICROAMISIL, MACROAMISIL, IDROAMISIL 250
Paints & coatings	Defoaming, silicone-free eco claims	FISIOREX 1000, wax emulsions
Paper & packaging	Pulp and process defoaming (FDA)	CPL 2907
Construction	Water repellents for mortars and facades	SILWALL, IDROREX

Customer names are shared under the signed agreement with its non-circumvention clause, as discussed.

5. R&D qualification route

- **Step 1 — Paper screening:** TDS, SDS and compliance statements to the customer's R&D; Silitex application questionnaire completed before any sample.
- **Step 2 — Lab benchmark:** 1–2 kg samples, side-by-side bench tests including accelerated stability (temperature and time agreed per application).

- **Step 3 — Pilot:** plant trial on the customer's line under a trial order.
- **Step 4 — R&D approval → purchasing:** technical sign-off, then commercial terms and recurring orders.

Typical time from sample to first order: industrial 3–9 months, cosmetics 12–24 months. We report progress monthly by stage.

6. Supply model

- **Direct per PO:** every order shipped direct from Cologna Veneta to the customer's plant against a firm PO, fresh batch, at least 80 % shelf life on delivery. No speculative local stock.
- **Origin:** EUR.1 movement certificate → 0 % import duty under the EU–Israel agreement.
- **Payment security:** LC or CAD for new accounts; open terms for proven accounts, as agreed with Silitex.
