Why Sano now

- Large liquid volumes → antifoam is a repeat, per-PO raw material.
- Softeners: silicone grades add a performance claim (softness, easy ironing, towels).
- Eco range needs plant-origin antifoams — few local suppliers offer them.

How this report was built

- Brands and categories from Sano's public website.
- Every grade checked against the Silitex 2026 Detergency catalogue (function, active %, pH / temperature limits).
- Grades are proposals for lab evaluation — not claimed as identical replacements.

3. What we need from Silitex

- TDS + SDS for the High / Medium grades.
- Stability data of DYNAWEED G-100 / ALKAFLUX 700 in hypochlorite gels.
- Eco-label documentation for FISIOREX 1000 / CPL 250 FOOD / EVEROIL 35.
- Lab sample size and lead time to Israel.
- Packaging / MOQ (drums, IBC) for detergent grades.
- Silitex starting formulas for a liquid detergent and a silicone softener.
