Israel Market Report #3 — Luxembourg Industries · Crop protection

Prepared by Sapirim (Avshi Sapir) for Silitex S.r.l. · Adjuvants, process antifoams, specialty formulations

19/10/2026 · **CONFIDENTIAL**

DRAFT · awaiting Silitex review

1. Account snapshot

Luxembourg Industries

Israeli crop-protection company — herbicides, insecticides, fungicides and complementary products (adjuvants)

Relationship

Owner is a personal friend of Avshi — direct access to management and R&D

Portfolio

83 products listed (15 herbicides, 35 insecticides, 21 fungicides, 12 complementary). Affiliates: Luxembourg-Pamol (USA), Luxembourg do Brasil

Key question

Which products are formulated locally? Many listed brands appear to be other manufacturers' products

Portfolio from luxembourg.co.il (19/10/2026). Brands such as Altacor, Ranman Top, Kenja, Command, Neemazal, Splat and Talstar are, as far as we know, other companies' products — silicone potential is only in what Luxembourg formulates itself.

2. Opportunity map — Silitex 2026 catalogues

Application	Need	Silitex grades to propose	Catalogue data	Priority
Adjuvants / spreaders (Nadran, Colfix, Leaf All)	Lower surface tension, wetting and spreading	**DYNAWEED 510 · DYNAWEED 2-100**	Silicone polyether, 100 % active; 2-100 wets without creating foam	High
Own SL / SC / EC formulations & filling	Process antifoam during mixing, milling and filling	**SILIFOOD 1600 · SILIFOOD 2000 · SILIFOOD 3000**	Dimethicone emulsions 16 / 20 / 33 %; catalogue: "additive for agrochemical formulations and pesticides"; 0.1–1 %	High
Net glue	Antifoam / de-aeration in glue	**CPL 2907**	Alcohol-based, silicone-free, self-emulsifying; "very suitable for glues and wax emulsions"	Medium
Pastes / matrices (if made locally)	Hydrophobic carrier, release	**Silicone Fluid 100 / 350 / 1000 (PDMS)**	Linear PDMS, 50–12,500 cSt; food & pharma grades available	Low
Plant waste water	Antifoam in treatment plant	**BERETEX 500 · BERETEX 750**	Silicone emulsions 5 % / 7.5 % for waste-water plants	Low

Why Luxembourg now

- Personal relationship with the owner → fast, honest feedback and quick lab access.
- Adjuvants are the clearest silicone use — wetting agents are a repeat raw material.
- Good reference account for other Israeli agro formulators.

How this report was built

- Portfolio from Luxembourg's public website.
- Every grade checked against the Silitex 2026 catalogues (Detergency, Food & Agri, Paint & Coating, Water Treatment).
- Product map is a first draft — to be reviewed and improved by Silitex before any customer use.

3. What we need from Silitex

- TDS + SDS for DYNAWEED 510 / 2-100 and SILIFOOD 1600 / 2000 / 3000.
- Surface-tension data of DYNAWEED 510 / 2-100 at 0.05–0.1 %.
- Any agro references or starting formulas (adjuvants, SC antifoam).
- Hydrolysis / pH stability of the polyethers in spray-tank conditions.
- Lab sample size and lead time to Israel.
- Packaging / MOQ for agro customers.

4. Next steps (Sapirim)

#	Action	Owner	Target
1	Intro to the owner (sent) + Hebrew 1-page lab proposal for their R&D	Avshi	Oct 2026
2	Meeting: list of locally formulated products + current wetting agents / antifoams	Avshi	Nov 2026
3	Data sheets + lab samples: DYNAWEED 510, DYNAWEED 2-100, SILIFOOD 1600	Silitex	After step 2
4	Lab trial vs current reference → pilot	Luxembourg R&D	Q1 2027
