

CareSil

The chemistry of care

CareSil™ Phenyl Fluid

Anti-Aging Day Cream

Formulation Data Sheet

- Light white, creamy oil-in-water emulsion
- Smooth and silky feel
- Non-greasy and non-tacky after feel
- Anti-aging
- Good spreadability
- SPF 10
- CPF-3300 acts as water barrier, reduces tackiness and adds emolliency

CPF-3300

CareSil CPF-3300 is an ideal formulary component used in a variety of skin care formulations:

- Moisturization
- Anti-Aging/Anti-Wrinkle
- Sunscreen, After Sun, and Self-Tanners
- Skin Repair Serums
- Skin Tone Repair
- Men's Grooming
- Color Cosmetics

Procedure

- Phase B preparation:
 - Heat Water at 70°C
 - Slowly add Carbopol Ultrez 10 ingredient with 600 rpm agitation
 - Mix until the solution is hydrated
 - Add Potassium Hydroxide solution
- Heat Phase A ingredients at 70°C, mixing gently, until completely melted
- Add Phase C to Phase B
- Add Phase A to Phase B/C and mix until uniform
- Cool Phase A/B/C down to 50°C (do not stop mixing) and add Phase D ingredients when T < 50°C
- Add Phase E when T < 40°C and continue mixing
- Homogenize using a high shear mixer (rotor-stator) at 3000 rpm

Properties

- Stability:
Stable for at least 3 months at room temperature and at 50°C
- Appearance:
White cream
- Viscosity Brookfield RV (spindle 6, speed 50, 25°C):
4500-5000cP
- pH:
5.0 ± 0.5

Introducing CareSil™

For the first time, skin care companies have access to medical-quality silicone to create breakthrough moisturization, anti-aging, sun care, skin repair serums and anti-wrinkle formulations.

The CareSil™ portfolio of silicone technologies includes novel silicone gels, phenyl silicones, low volatility silicones, custom silicone formulations and the delivery of actives for use in next-generation skin care products. Available in a variety of concentrations in various diluents, viscosities and refractive indices, CareSil's silicone product line is innovative and diverse to match your specific needs and requirements.

Unprecedented Levels of Purity

Formulated at the molecular level using our proprietary purification technology, CareSil silicones have dramatically low levels of unwanted volatiles, producing the industry's most pristine silicone.

Backed by NuSil's years of proven experience in healthcare creating delicate implantables for use inside the human body, our silicones perform without fail in the most extreme conditions and meet strict regulatory standards.

Formulation Composition

	Ingredient: INCI name	Wt. %	Trade name / Supplier
Phase A	Cetyl Alcohol (and) Glyceryl Stearate (and) PEG-75 Stearate (and) Ceteth-20 (and) Steareth-20	4	Emulium Delta / Gattefossé
	Cetyl Alcohol (and) Isostearyl Isostearate (and) Potassium Cetyl Phosphate (and) Cetyl Behenate (and) Behenic Acid	2.5	Duraquench IQ / Croda
	C12-15 Alkyl Benzoate	3	Liponate NEB / Lipo Chemicals
	Tocopheryl Acetate	0.5	Vitamin E / Protameen Chemicals
	Echium Plantagineum Seed Oil	3	RevitElix / Croda
	Phenyl Trimethicone	3	CPF-3300 / NuSil Technology
	Cetearyl Ethylhexanoate (and) Isopropyl Myristate	2	PCL Liquid / Symrise
	Ethylhexyl Methoxycinnamate	5	Neo Heliopan AV / Symrise
	Octocrylene	3	Neo Heliopan 303 / Symrise
Phase B	Water	64.9	-
	Carbomer	0.2	Carbopol Ultrez 10 / Lubrizol
	Potassium Hydroxide (18% sol.)	0.5	-
Phase C	Glycerin	3	-
	Disodium EDTA	0.1	-
Phase D	Water (and) Juglans Regia (Walnut) Seed Extract	2	Gatuline Age Defense 2 / Gattefossé
	Butylene Glycol (and) Actinidia Chinensis (Kiwi) Fruit Water (and) Alcohol (and) Sophora Angustifolia Root extract	1	Synerlight 2 / Gattefossé
	Helianthus Annuus (Sunflower) Sprout Extract (and) Sodium Benzoate (and) Water	2	Shoot Active Flower / Mibelle
	DMDM Hydantoin	0.2	Glydant 2000 / Lonza
Phase E	Perfume	0.1	Fleuri frais / MLW
