Introducing CareSil™

For the first time, skin care companies have access to medical-quality silicone to create breakthrough moisturization, anti-aging, sun care, skin repair serums and anti-wrinkle formulations.

The CareSil™ portfolio of silicone technologies includes novel silicone gels, phenyl silicones, low volatility silicones, custom silicone formulations and the delivery of actives for use in next-generation skin care products. Available in a variety of concentrations in various diluents, viscosities and refractive indices, CareSil's silicone product line is innovative and diverse to match your specific needs and requirements.

Unprecedented Levels of Purity

Formulated at the molecular level using our proprietary purification technology, CareSil silicones have dramatically low levels of unwanted volatiles, producing the industry's most pristine silicone.

Backed by NuSil's years of proven experience in healthcare creating delicate implantables for use inside the human body, our silicones perform without fail in the most extreme conditions and meet strict regulatory standards.
